

The benefits to having a rain barrel are huge. First, water in your rain barrel is not subject to community watering restrictions and has no additives like fluoride or iron to irritate your plants. Second, your water bill will be smaller. Third, a rain barrel helps reduce problems associated with storm-water runoff.

Food-grade plastic barrel

Flexible window screen

Faucet, 3/4" male

Pipe coupling, female, 3/4"

Washer, inner diameter 1" to 1 1/16"
